Community Environment Center

The Weatherization Assistance Program (WAP) delivers energy efficiency and conservation services to low-income households, particularly the elderly, families with children or the people with disabilities. Our work can help building owners upgrade their buildings, offer health and safety testing, reduce energy consumption and can result in immediate cost saving to owners and tenants. Some of the services we may provide:

replacement, retrofitting, or repair of heating appliance systems, including boilers, testing for gas leaks, installing smoke and carbon monoxide detectors, installation of high-efficiency cellulose installation in walls and attics, Installation of low flow shower heads, aerators and energy saving light bulbs, superior weather-stripping and air-sealing.

At least fifty percent of tenants must have an income below 60% of state median in order to be eligible for this program. For information please call 718-784-1444 or visit the web site www.cecenter.org
